DETAILED ACTION

Claims 32-52 are pending in the instant application. Claims 1-31 have been canceled.

Priority

This application is a 371 of PCT/IN03/00004, filed 01/06/2003.

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d) by application no. 9/MUM/2002 filed in the Indian Patent Office on 01/07/2002, which papers have been placed of record in the file.

Response to Election/Restrictions

Applicant's election without traverse of Group II in the reply filed on 22 June 2006 is acknowledged.

Group II: Claims 48-52 drawn to the intermediate compound of formula (3),

, wherein Z is O and R is aryl and claim 37-47 drawn to the process of preparation of the compound of formula (3), wherein Z is O and R is aryl.

Scope of the Elected Invention

Claims 32-52 are pending in this application.

The scope of the elected subject matter that will be examined and searched is as follows:

Art Unit: 1626

Claims 48-52 drawn to Compounds of formula (3), depicted in claim 48, page 11, wherein: **Z** is oxygen and **R** is aryl.

Claims 37-47 drawn to a process of using the compound of formula (3) will be examined. Claim 32 will also be examined as Claim 37 is dependent on Claim 32.

Claim 33 will also be examined as it is the process of making the compound of formula (3).

Scope of Withdrawn Subject Matter

Claims 34-36 drawn to the process of making the compound of formula (4) are withdrawn from further consideration by the examiner, 37 C.F.R. §1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Rejoinder

Claims 48-52 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 32, 33, and 37-47, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 25 May 2006

Art Unit: 1626

is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Mark Pohl on 21 July 2006.

The application has been amended as follows:

Delete claims 34-36.

Allowable Subject Matter

Claims 32, 33, and 37-52 are allowed.

The closest prior art of record, Weyer et al., etc..., teach substituted pyrrolidin-2-one derivatives and the process of making and using this product wherein the group corresponding to Z is nitrogen, but not where Z is oxygen like in the instant application.
